* depending upon type of loading

We did the test as ISO 8611-1:2011. We warn to check always the conditions of load and of storage of the pallet, taking into account the environmental factors like the time of storage and the temperature of the warehouse. Imball Nord s.r.l. can modify the technical characteristics that we have described in the upper part whenever it likes, without forewarning.

You can't put the pallets in direct contact to the food; you must to use something amid the food and the pallet.
